OLD RELIABLE

THE PRACTICE OF PHARMACY dates back THE PRACTICE OF PHARMACY dates back to the paimy days of 00 d Eypt, and has always been considered one of the most honorable of mercantile pursuits. The weil equipped and intelligent pharmacist is an indispensable factor in the satisfactory practice of his profession by the Physician, and, white of course, any calling where buying and seiling of merchandise constitutes all large percentage of the business done is nurely mercantile, still, there is a tradition among Pharmacists that the practice of Pharmacyls, or should be considered at least, SEMI-PROFESSIONAL. This traditionary belief is so desply rooted in the minds of many estimable and cenrooted in the minds of many estimable and con-scientious Pharmacists that it becomes a sort of religion with them; we are sure the feeling is a resigion with them; we are sure the feeling is a noble one, and one worthy of all respect, and yet the cold, hard fact remains that sentiment and BUSINESS, in this commercial and industrial age, have beecome as widely divergent as the poles. Thus it follows, that while the intelligent and scrupulous Pharmacist who has perhaps devoted years of study in acquiring his knowledge, and demands semi-professional pay—he leaves the door wide open for the mercenary attack of any un scrupulous outside concern who chooses to prostitute the business for advertising purposes.

We discarded the semi-professional phantom some ten years ago, and although we are now a comparative "stranger in a strange land,"—gulie-comparative "stranger in a strange land,"—gulie-

some ten years ago, and aithough we are now a comparative "stranger in a strange land,"—gulleless, and unaccustomed to woolly western ways—we have already applied the scalpel to an ULCER on the Drug trade of the city, and although our patient squirms a little under the knife, it will feel better after the operation is over.

We are merchandising in DRUGS, MEDICINES and DRUGGISTS' SUNDRIES. We do not interfer it any other line of business what-

There were 66,637 original claims allowed during the year, being 14,716 more original claims than were allowed during the fiscal year 1889, and 6385 more than allowed during the fiscal year 1898. The amount of the first payment in these 68,637 original cases amounted to 332,478,041, being \$11,036,492 more than the first payments on

amounted to \$32,478,041, being \$11,036,492 more than the first payments on original claims allowed during the fiscal year 1889 and \$10,179,225 more than in 1888. Of the system of "completed files" organized by him, the Commissioner says in part:

Under the system of "completed files" the claimant has a right, upon proper certification that his claim is complete, to have it immediately placed upon the completed files, and taken in order for adjudication, Claims placed upon the "completed files" are taken up within a week for action, and if "ound complete are immediately allowed. If proofs are lacking, a call is immediately made upon the claim at to supply the deficiency, and upon the receipt of the required evidence the claim is again taken up for consideration.

juired evidence the claim is span-for consideration.

To the last day of June, 92,761 claims were placed upon the completed files, upon re-quests made upon betalf of claimants. This system has not the effect of enabling many thousand claim uts, whose claims had been pendig transfer to twenty years,

business methods of the office more work is accomplished in a given time than ever performed before.

In October, 1889, when I took charge of the office, the work of adjudicating claims and issuing certificates had, from July 1, 1889, fallen far behind the same period for the previous fiscal year; white from October 20, 1889, to June 30, 1890, there was an increase in the adjudication of claims and issuing of certificates greatly in excess of the same period of the preceding fiscal year. This is shown by the following statement of work done: Total number of certificates issued for the year ending June 30, 1890, 1850, 51,605; total number of certificates issued for the year ended June 30, 1890, 145,202; increase in 1890 over 1889, 6366. Total original certificates issued for the year ended June 30, 1890, 1890, 1890, 1890, 160,60,637; total original certificates issued for the year ended June 30, 1890, 1890, 1890, 1990

to the force engaged in the adjudication of claims, and practically by concentrating the work of the office for five days in the week upon the adjudication of claims as provided for in order No. 149, greating a system of "completed files." In June last I detailed 146 persons as an additional force for special examination, making in all 333 on duty, in the field. As a result of these efforts the number of cases now in the hands of, the special examination division has been reduced from 14,425 to 7,284; of these oaly about five thousand are in the hands of special examiners, the others being in transit to and from the dime.

There had been received 460,282 claims to September 30th, under the disability pension act of June 27th. The care of such an enormous number of claims received in so short a time necessarily taxed the resources of the office to the fullest extent. The work of the mail division ran up to more than 32,000 pieces of mail per day, to be opened, classified and properly disposed of. At this writing (October 1st) the division is handling 10,000 claims a day. It is believed that there are probably one hundred thousand claims in the office which can be properly allowed under the provisions of the regulations approved September 16th, 1890.

In conclusion the Commissioner says: In conclusion the Commissioner says:

In conclusion the Commissioner says:
The act of June, 1890, is the first disability
law in the history of the world which
granted to soldiers and sailors pensions for
disabilities not proved to have been incurred in the service and line of duty.
This law recognizes a higher obligation of
the people to their disabled veterans than
was ever formulated into law before.
Nothing shall be left undoue by this bureau
to give effect to this latest expression of the
gratitude of the American people to the
soldiers who saved the republic.

acted upon but one, and since 1879 has not attempted to consider any cases whatever. The plan of having Congress act upon these claims, he says, is a preposterous failure. During the year entries to public lands aggregated 17,734, of which 639 were pre-emptions. The total assessed valuation of the property of the territory is \$46,041,010, and the territorial indebtedness, \$870,960. Crops of all kinds are fully up to the average, and larger acreage was planted this year than ever before. The cattle industry has improved of late and the sheep owners also had a good year. The mining industry is in a flourishing condition, the total output of gold, silver, lead and copper aggregating over \$4.000,000. The government in conclusion makes a strong rales for Statehood and agas and copper aggregating over \$4,000,000. The government in conclusion makes a strong plea for Statehood and says none of the Territories recently admitted compare with New Mexico in population, wealth, intelligence, or in every quality necessary to build up prosperous Statehood.

The Democratic County Convention Today.

The Democratic County Convention will meet in Turnverein Hall this morning at 10 o'clock. The indications are that the convention will be a rather tame affair, as but little intereft is being manifested. There were but few people about the hotels last night, which was in marked contrast with the state of affairs on the evening preceding the meeting of the Republican convention. It is probable that a fight will be made on the Tammany Club, as several prominent members of the party were denouncing that organization yesterday afternoon. that a fight will be made on the Tam-many Club, as several prominent mem-bers of the party were denouncing that organization yesterday afternoon and last night, and during the after-noon a meeting was called by Joseph Mesmer and others with a view to sit-ting down on the Tammanyites. It is probable that a coalition will be formed between the country delegates and the better elements of the city Democracy for the purpose of knocking out the seekers into the country yesterday.
The party consisted of Eastern people.
Several of the company were of German descent and lately from Europe.

Mr. Coleman, after thanking the citizens of Los Angeles for the hearty reception which he had received, said:

The speaker then went into some discussion of the figures in the recent elections in Maine and endeavored to show that Mr. Reed's handsome maelections in Maine and endeavored to show that Mr. Reed's handsome majority had no political significance. He then went over the Republican and Democratic State platforms and compared them, one plank after another. He accused the Republican party of forgetting several important points, such as sumptuary legislation, the wine interests, the ottizen soldiery, the San Quinten outrages, etc. He found a number of points of alleged superiority in the Democratic platform.

The speaker next called attention to the fact that the Bar of Los Angeles had offered the names of Judge Van and Democratic conventions on the ground that the southern part of the State was entitled to representation on the Supreme Bench. The Democracy had responded, but the convention at Sacramento had ignored the request.

Mr. Coleman then spoke of the matter of the popular vote for Senator and President, and made a reference to

The Council was called to order yesterday morning at 10:05. There were present President Frankenfield and Councilmen Brown, Wirsching, Summerland and Bonsall, There being no quorum, some one went in search of Councilman Shafer, who was found in an adjoining room. Councilmen Hamilton, Van Dusen and Brown put in an appearance later.

TELEPHONE LICENSE VETO. After the reading of the minutes the veto of the Mayor on the telephone license ordinance, [heretofore printed in THE TIMES | was presented.

Councilm an Shafer moved that the vote by which the ordinance was passed be reconsidered.

Councilman Hamilton then moved that the ordinance be again passed.

Judge Carpenter, representing the company, was given the floor. He said: The Mayor assumes that because the company has 1000 telephones it has an income of \$50,000 a year. This is a mistake, as there is a percentage of bad debts. The city has forty tele-phones at reduced rate. The company pays 50 per cent. to the Bell Telephone Company for the mpany for the use of the system, and pays taxes on an assessment of \$13,000. If that is not enough it is the Assessor's fault. The Mayor complains of the poles. Will the increase of the license make any difference in this matterial. ter? The tax of \$1000 a month is 50 to

of the company.

Councilman Shafer said that the question was too new for him to feel inclined to vote upon it. He wished to see it committed. The fact that the Bell Company charged such an exorbi-tant rate did not relieve the local com-pany from the necessity of paying a fair license. Councilman Rangall moved that it ha

which the ordinance was passed was carried.

Councilman Shafer moved that the ordinance pass notwithstanding the objection of the Mayor.

Councilman Brown said that the Mayor had his mind made up, and for that reason demanded that the Councilman should not remain in doubt.

The motion was carried Councilmen Wirsching, McLean and Summerland voting "no."

Reports of the various city officers were then read and sent to the appropriate committees.

Mother Ranson, the was present the Home had changed its quarters to Bonsallo avenue. She saked the Council to assist in the work. This matter came up some time ago and was referred to the Police Commission, but no report has yet been made. The clerk was instructed to call on them for a report.

CITY ENGINEER'S REPORT.

CITY ENGINEER'S REPORT. The City Engineer's report was then read. An ordinance for the paving of Marchessault street from New High to Marchessault street from New High to Upper Main with porphyry was read and passed. In the matter of the storm water on Almeda street the City Engineer reported that gutter culverts large enough to carry off the water would be an obstruction to the street. PROPERTY OWNERS PROTEST. The City Attorney presented the following report, which, on motion of

Councilman Shafer, was adopted: Upon the report of the Board of Public Works that the "street superintendent personally appeared before the Board and officially protested against the Council or the Board of Public Works entertaining any the Board of Public Works entertaining any protest of property owners against his decision in regard to the construction of sidewalks, I report as follows: Section 11 of the Vrooman act provides that the owners, the contractor and all other persons interested in the work, feeling aggrieved by any act or determination of the superintendent of streets in relation to the assessment or who claim that the work has not been performed according to specifications, or who have any objection to any act or determination of the Superintendent of Streets in relation to the same, shall have the right to appeal to the same, shall have the right to appeal to the City Council within thirty days after the date of the warrant. It also provides the City Council within thirty days after the date of the warrant. It also provides for notice of hewring of such appeal, and upon such hearing the City Council may remedy or correct any error or informality in the proceedings and revise and correct any of the acts or determination of the Superintendent of Streets relative to said work, may confirm amend, set aside, after, modify or correct the assessment in such manner as to them shall seem just, and require the work to be completed according to the directions of the City Council, and may instruct and direct the Street-Superintendent to correct the warrant, assessment or diagram in any particular, or to make and issue a new warrant, assessment and diagram to conform to the decisions of said City Council in relation thereto, at their option. All decisions and determinations of said City Council upon notice of hearing as aforesaid shail be final and conclusive upon all persons entitled to appeal under the provisions of this section, etc., I am of the opinion that this section intends and provides that when an appeal is taken to the City Council In the case in question, I understand an appeal has been taken to the Council. In the case in question, I understand an appeal has been taken to the Council, and that it ordered the contractor to make the work conform to the plans and

specifications, and that there has been a second appeal filed by the property owners, claiming that this has not been done. I think this section provides for but one appeal, and that the second appeal cannot be considered by the Council as such, but should be considered by the Council as such, but should be considered as a communication calling the attention of the Council to the fact that their instructions have not been carried out. I think the proper course in this case would be for the Council to inspect this pavement and ascertain whether one to the pavement and ascertain whether one to the pair and specifications and then accept or reject the same as the case may be.

ANOTHER VETO MESSAGE.

The following communication from

The following communication from the Mayor was read:

This demand presents a very important question in this: The rejected portion, \$55.77, represents what it wilt cost the city, if it be paid, to have the Arroyo do los Reyes storm drains destroyed. I called your attention to this w rk at the time it was being done, but it appears no attention whatever was paid to the matter. If so, I have not heard of it, and the work of destroying the storm drain was proceeded with, and now the city is asked to pay for this work of spoliation the sum of \$55.77. The storm drain cost the city in the first place a large sum of money, projected and constructed under the City Surveyor of a former administration. It is too be do have this storm drain deliberately destroyed, but to be obliged to pay dorn thing that should not be done if it can be authority of the engineer's office to bind the city in a case of this kind without a contract in writing. This storm drain was of brick, which was deliberately intersected by this sewer, at each point where the sewer crossed the street fail in. This character of destructive work ought not to be approved by your honorable body, much less to pay for it. The unfortunate part of the whole matter is that the men who did this work are not to blame, but the engineer's office, where the order for the same originated; but I know of no way of protecting the city against loss in cases of this kind, except to refuse to pay for it. Demands for work of this kind should be paid by those ordering the same.

The city engineer declared that the attention to the storm drain was not destroyed. The storm drain was not destroyed. The

On report of the City Engineer in regard to the repaling of the paving of Main streets south of Third and Spring streets, the Board finds on investigation that the contract of G. A. Dobinson and J. A. Fair-child of June 1st, 1887, to pave and curb Spring street from Temple to Ninth and Main from Third to Ninth; also for Marchessault to Alameda, binds them to keep said streets in perfect repair for five years; that a bond of \$50,000 is on file as stated by the City Engineer, with Alfred Walker, W. J. Brodrick, E. F. Spence, J. F. Crank as sureties for the faithful performance of the contract. In view of these facts we recommend that the City Clerk be instructed to notify said company to at once comply with said contract, all work to be done under the direction of the Street Superintendent.

Recommended that the accompanying by

Asphalt is clean and healthful. Stone has one-fifth of its surface of joints filled with animal filth. Horses, besides doing more work, last longer, and repairs of vehicles and harness are less on asphalt than on any other.

In observations to ascertan the volume of traffic on streets, by Capt. F. V. Green, U. S. THE annual report of the Pension Commissioner, a notice of which comes this morning by telegraph, shows that there were, at the end of the last year, 547,944 pensioners upon the rolls. Much has been done, during the past year, to facilitate the more rapid settlement of claims.

MORE remarkable discoveries have been made by a United States surveyor on the borders of Alaska and British Columbia, including what is said to be the largest glacier in the world, and great range of mountains behind Mount. St. Elias. This is a big country and we still have a good deal to find out about it.

A CORRESPONDENT in yesterday's TIMES called attention to a very important matter-the ventilation of our public schools. While putting up handsome and expensive buildings, we have been wofully negligent in the vital question of a supply of pure air for the inmates. As a consequence, it is quite a common thing for children to severe headache. The foundation for re serious diseases is doubtless often laid in this manner.

THE London Daily News, which is controlled by John Morley, the great English Libersl and friend of Gladstone, is one of the most reasonable and broad-minded of the English papers, and always has a good word to say for the United States. improvement in the business out-look for this section. We have undoubtedly reached the foot of run out. the declivity of hard times and are about to climb the hill of prosperity. We are not likely to have any boomthat is, any real estate boomwhich is a good thing, for we have learned by bitter experience that the reaction from such a period of undue excitement lasts longer than the boom itself—but we may safely count upon an era of solid prosperity commencing this winter, such as Southern California

has never yet witnessed. One of the leading causes which has conspired to produce this desirable condition of affairs is undoubtedly the great demand which has existed in the East for our fruits and the high prices paid therefor. It is a fact that, in many cases, fruit-growers have realized more per acre, this year, from their lands than they asked for it even dursought after by deluded speculators than "business lots" on far-off mesas. As a result of our fruit-growers' success, there is quite an extensive de-mand for orchard land and for nursery stock. So great is the latter that many nurseries are depleted an I have orders far ahead. It may, therefore, plainly be seen that the present movement is a legitimate one, founded on production-a movement which will bring the country up even with the city. which, during the boom, grew so far ahead of it. For the benefit of those in the East who have not watched the wonderful development of our fruit industry, we may mention the fact that the Southern Pacific and Santa Fé companies are now running about 2500 fruit cars, while but a few years ago fruit had to be shipped in ordinary freight cars.

Another proof of the turn in the tide is the increasing demand on the part of long-headed capitalists for bargains in real estate. Men who formerly confined themselves to mortgages are now looking for investments, THE TIMES of Sunday contained more than a columa of advertisements of real estate for sale, which is more than has an peared on any one day since the boom.

Look, again, at the confidence displayed by outside capitalists in the future of this section, by their willingness to invest millions in improvements. Arrangements have about been completed to commence work on no less than five important railroad enterprises in Los Angeles, involving an expenditure of over \$5,000,000. These are the Terminal, the Electric Belt, the electric system before the Council yesterday, the Second-street cable and the Lor Angeles and Pacific to Santa Monica. Men do not put millions into such en terprises where they are not well assured of a substantial return.

Again, the building business is phe nomenally active in Los Angeles. Go which way one will, there are stores and dwellings in course of construction. On the seacoast the same activity is noted. At San Pedro, Redondo Beach, Newport Landing and Ballona improvement is the order of the day, while Santa Monica and Long Beach expect soon to join the progressive procession.

Truly the outlook for Southern Calihave pinned their faith to this match less portion of God's footstool.

HOW REED SUPPRESSED OB-STRUCTION.

One of the most noteworthy instances in which the Republican party has placed itself on record during the past session as a party worthy of the position which voters two years ago chose of numbers, looked remarkably small in that wat audience, though a fair-sized one in point of numbers, looked remarkably small in that wat audience when the imtion which voters two years ago chose t to occupy; is in the overcoming o willful and senseless obstructions placed by a Democratic minority in the way of legislation, except such as suited the Democrats.

It was at the very beginning of the season that the Democrats announced their intention of preventing any legis lation whatever in the direction of reforms promised to the people by the Republican party. The object was, of course, to send the Republicans to the country with an empty record, and to do that they were willing to waste both the people's time and the people's Their plan was simply to interrupt business with motions to adjourn; to recommit; to amend, to strike out and insert, and other similar frivolous devices for the consumption of time. When their means failed to bury a measure, they proposed to sit in their seats silently during a rollcall, not responding to their names This would leave the record apparently showing that the House was without a

However, we all know what Burns tells us about the "best laid plans of mice and men." These Democratic filibusters reckoned without their host or rather without their Speaker. Reed was too much for them. He could not be bulldozed. He declined to entertain frivolous and obstructive motions, and he held that no member could remain within the Speaker's vision and declare himself present or absent accarding to the partisan ends he wished to serve. Of course the Demoreturn from school complaining of a crats went beyond the bounds of decency in abusing a man who thus upset their little game, but Reed belied his name and remained firm as a rock amidst the waves of Democratic howls. His decisions were finally incorporated with the rules of the House, since which time the public business has gone forward in an orderly manner. He and the party which backed him have the indorse ment of all right-thinking men in the country, while the Democrats have laid themselves open to public scorn subject of the McKinley bill, the News by their puerile and unfair tactics. Los Angeles county appears to be the headquarters for California of those rainbow-chasers known as Nationalists. In fact, there is probably more Nationalism to the square inch in this county than in all the rest of the State together. The public would probably take more interest in the Na tionalist movement if people could make out just what it is driving at, but, as even its members do not ap pear to be united on this point, it is hopeless to expect more of the outer barbarians. In Sunday's Times three Nationalist correspondents expressed diametrically opposed views, regarding a certain plank which was put into a platform at a recent Nationalist meeting in this city. Again, we note that the Pasadena Nationalist Society is about to change its name to the "Soing the days of the boom, when, by the ciety for Ethical Culture," This does way, productive land was much less not look like very healthy growth on the part of a young organization. The Nationalist movement is a socio-political fad, which will remain in fashion until it is supplanted by something more original.

MAYOR HAZARD has again given evidence of the fact that he possesses a stalwart backbone. He cannot be hurried into approving a measure buried into approving a measure concerning the desirability of which he has doubts. In the matter of the Belt Electric franchise, he has announced that, while favorable to the construction of the road, he is determined to give property-owners along the course of the line a chance to express their opinions on a matter of such great importance. This is just and proper. It would have been seemly had the Council, in its treatment of this question, displayed the same sensitiveness in regard to public opinion as they have shown in the matter of the Sunday closing of salcons.

The City Attorney was yesterday instructed by the Council to insert in the First street grade ordinance a district of assessment to commence at the west side of Broadway. As pre-

viously stated it is a pity that the

body let the matter rest for a week to give the public a chance to be heard from. Quite right; but why does not fornia is a most promising one, and this same argument hold good in the such as to cheer the hearts of all who question of the far greater and more important Belt Electric road?

AMUSEMENTS.

ACADEMY OF MUSIC.-Last night the first of a series of performances at this place was given by John S. Lindsay and comwas given by John S. Lindsay and company, under the management of Wyatt & Conant. The piece chosen was the rominitie and rather tiresome drama, Ingomar. The Pavilion was not crowded, in fact the audience, though a fair-sized one in point of numbers, looked remarkably small in andience, though a fair-sized one in point of numbers, looked remarkably small in that vast auditorium, and when the limmense curtain was slowly drawn up the voices of the actors came across the open with an unfamiliar ring, and there was a lack of distinctness, with one or two exceptions, so that the place lost the aspect and atmosphere of a theater, and the performance suffered thereby. Under these circumstances the play, a difficult one to present, was not a brilliant success.

Mr. Lindsay is a stock actor, trained in the conventional school, the possessor of a robust voice and a tall, though not too robust physique. He has no art, and his methods are decidedly crude; still he produced a fair impression in the scenes where he wore his Nebuchadnezzar-like hair and beard, and it was only in the last act that he appeared at a disadvantage. Miss Luella Lindsay made quite a pretty study of "Parthenia," marred only by a rather strong Western accent and a few peculiarities of pronounciation not justified by the best authorities. Her personation was distinguished by graceful action, and the young lady showed that she possessed a very good grasp of the character. She ha an attractive appearance, and will doubtless improve with further study. The supporting company did not exhibit much ability, but there is not much demand made upon them in this piece, the chief business being confined to the two principal characters.

Tonight Hazel Kirke is the attraction.

THE CRYSTAL SLIPPER. This extravaganza was booked to be produced at the Grand Operahouse next week and would have proved a very profitable attraction for the managers. The piece is now being given at the Grand Operahouse in SacFrancisco to a tremendous business. Mr. Hayman is doing so well there that he has concluded to put in all the remaining time in the one house, and has therefor peremptorily canceled the company's bookings in Los Angeles, Oakland and Sacraments. As a financial proposition it will of course pay him better to continue whehe he is with his excellent business than to incur the expense of taking his big company, with their pay him better to continue whehe he is with his excellent business than to incur the expense of taking his big company, with their several carloads of scenery around the country. The excuse made for canceling here, is that the scenery is too large for our stage; but Mr. Hayman knew its size when he booked the attraction, and the excuse is thin. The decision is to be regretted because our play-goers will be deprived of a brilliant spectacle produced on a scale of magnificance that is said to excel anything of the kind on the stage today.

As a result of the agitation of the electric light question and the prospect of competition, the present company has submitted an offer to light the city for the next two years for about \$87,000 a year. Justin McCarthy made the opening speech. He referred to the trial in Tipperary as grotesque. Parnell, he said, although absent, was in active cooperation with everything they did. He had studied and sanctioned all the resolutions. The death of Sexton's mother compelled him to be absent. In soite of these absences the

deep it is not so broad and deep as the purses of the friends of Ireland.

Redmond paid a high tribute to the generosity of Ireland's American friends, but in too many cases this generosity had simply had the effect of filling the coffers of Irish tandlords. If Irishmen did their duty to themselves and the Parnellites were able to force the government to do a small part of their duty it would be possible to tide over the coming distress without the humiliation and shame of again appealing to the charity of the world.

All of the resolutions carried unanimously. The Mansion House was jammed and the greatest enthusiasm was displayed.

Dillon, O'Brien, Sheehy, Harrison and Condoni returned to Dublin tonight. They were met at the station by a great crowd, and repaired to Dullon's residence. Dillon made a brief address, saying that he and his associates would be no party to parading the Irish people to the world as a nation of beggars. The people ought not to be driven to beg when there was food enough in the country. O'Brien praised the generosity of the Irish-Americans, and spoke of the importance of today's conference as a parliament of the whole Irish race.

Pappell sent a telegram to the conference saying he greatly regretted his inability to be present and ex-

ference saying he greatly regretted his inability to be present and ex-pressed confidence that the deliberapressed conneces that the delibera-tions-of the meeting would be guided by wisdom and patriotism and the re-suit be for the good of the public. says:

It cannot be said that he has made anything like a clean breast of the murder. All he has done thus far is to make a number of half confessional statements and drep hints and admissions, which, pieced together, form a tolerably complete story. To sum up he acknowledges that he was an accessory. He confesses he trok Benwell to Eastwood and beyond in the direction of the swamp, but resolutely sticks to it that his was not the hand that siew the victim.

All through his conversation since conviction Burchell insisted that he had an accomplice. He made it appear that this accomplice is a young Englishman named Grabam, who at one time lived with Pickthall on the latter's farm. No one will for a moment believe the charge against Graham true. There is not the slightest evidence that Graham was seen near the swamp on February 17th.

Morehouse delivered a great speech tonight and kept the vast audience enthused to the cheering pitch most of the time. His fine voice was never better than on this occasion, and he held the audience like a master, playing upon its heartstrings with his pathos and rousing it to wild enthusiasm by his invective. The gallant orator and geatleman leaves our little band after the meeting tomorrow night at Sacramento, and there are pangs at the parting. He is as genial as a companion as he is great as a speaker, and the weeks of association in wild rides on trains and across country and upon the hustings has endeared him to the band of campaigners in no small degree. George Knight, that other great speaker of California, the born stump orator and the fearless fighter, joins us on Sunday and makes his initial speech in the mountains at Downieville. Morehouse goes south and will be in Los Augeles soon. I have assured him that you will all be on hand to hear him and you must help me make the assurance good.

Senator Washburn on National Politics.

THE TARIFF BILL DISCUSSIONS

W. W. Foots on "Democratic Polltics" and Senator Stanford-The Next State Legislature-The Honest Democrat.

[San Francisco Chronicle, Oct. 5.] United States Senator Washburn of Minnesota is a guest at the Palace

"Although I am ashamed to say it," remarked Senator Washburn to a Chronicle reporter at the Palace last evening, "this is my first visit to this great Western metropolis and I might add to this wonderful State of Cali-fornia. As a member of the Commerc-Oommittee I have been particularly interested in the river and harbor appro piations, and now while I am here I propose to look over the ground for myself and see the actual needs of Government improvements in that di-

"I do not think there will be any extra session of Congress, as there is absolutely no occasion for it. At the next regular session we will finish up a large amount of unfinished business. The House of Representatives will undoubtedly pass the Postal Subsidy Bill and the Bounty Bill, looking toward the restoration of American commerce. The house has already passed the Bank-ruptcy Bill, which will, of course, be passed by the Senate. At the next session the Election Bill will come to the front for passage.

"Now that the McKinley Tariff Bill

"Now that the McKinley Tariff Bill has become a law, it will create public discussion for some time to come, to the exclusion of all other Government questions. I am glad to see the English and German governments so strong an opposition to the bill, for it means a good sign for its success. There is a great prejudice against the McKinley bill throughout the Mississippi Valley, and all over the East for ippi Valley, and all over the East for that matter, as the people on the whole do not seem to understand it. This extended prejudice may result in a temporary loss to the Republican party, but in the end it will prove to the vantage of both the party and to the entire country. We do not at the present time realize the vast importance of the law. We have been importing 3,000,000 dozen eggs annually from Lower Canada, and about 11,000,-000 of barley. The American maltsters have apparently preferred Canadian barley to that grown in this country. Grain, hay and produce heretofore im ported from Canada will hereafter be grown at home. The McKinley Bill will prove of great value to California, especially to your wool, raisin and wine industries, and will make this State rich and prosperous. In 1892 all will understand the now perplexing questions, and no one will then be called upon to defend the Tariff Bill or the Silver Bill. With the restoration of our American commerce we will have renewed activity in our ship yards which will materially benefit the Pacific coast. California will share in the general prosperity to ensue from the passage of these measures more, I think, than any other section of the

United States. .
"After remaining in San Francisco for several days my family and I will visit Menlo Park, Monterey, Los An-cales and San Diego, and then return-East by way of Salt Lake and Denver."

W. W. Foote on Stanford. (San Francisco Chronicle, Oct 5]
Metropolitan Hali was well filled last night with an audience invited by the Iroquois Club to an entertainment and a lecture on "Democratic Politics."

The orator of the evening was Hon. W. W. Foote, who, judging by the en-thusiostic reception he received, was evidently a prime favorite with those present. Mr. Foote's speech was made up of abuses of everything Republican and of praises of everything on the

Markham, he said, was a good enough man, but he was not to be com-pared with that paragon of honesty and integrity E. B. Pond. Morrow, he allowed, was an excellent Congress-man, but Robert Ferral, to whom he referred as his "red-headed friend." would adorn a chair in Congress far more. Morehouse came in for his share of abuse. Judge Coffey was eulogized as the friend of the widows enloyed as the friend of the widows Robert Stocks, aged 33, native of

and orphans, Del Valle was portrayed as a little god, and all the rest of the men on the Democratic ticket were shown to be angels. By the way of contrast the editors of an evening paper were roundly scored for their disparaging remarks about Stephen M. White. Mr. Foote devoted considerable time to informing his audience that Leland Stanford was corrupt, and he asserted that Aaron A. Sargent died with the knowledge that Stanford had purchased his seat in the United States Senate. The speaker positively stated that he had been personally informed by Sargent that thirty-three votes in the Legislature which elected Stanford had been pur-

Markham's Strong Personality.

The most notable feature of the State campaign up to this time is the pre-eminence which Markham's per-sonality has held in it. Whether we read Republican or Democratic papers it is still Markham's name that meets the eye oftener than anything else. He seems to be more popular even than the platform, and it begins to look as if he might have carried the people on his record alone. His tour with Morehouse through the State has so far been an ovation rather than a can vass. According to all reports he is met everywhere with an extraordinary assembl ge of citizens of the best class, and his words are applauded to the echo. He becomes every day more and more the dominant forter of the contractors. factor of the contest, and despite the wit and satire aimed at his mag netism and his hand-shaking, he goe on attracting everybody by the one and confirming them to his standard and his party by the cordial grasp of the other.

The Legislature

In Legislature, Isan Francisco Call.

If the Legislature is Democratic it will send a man to the Senate whose vote will be cast, if opportunity offers, to repeal these measures. Let the people choose between the two. California has been especially favored by the work of the present Congress. The duties laid on fruit and wine will develope into grand proportions; indusvelope into grand proportions; indus-tries which are as yet in their infancy. The bounty on sugar will, if continued, cause sugar factries to spring up in all parts of the State. The culture of sugar-beets will be found more profitable than the culture of grain,

and the factories will convert this raw material into merchantable goods will give employment to thousands of people. It is not possible to estimate the value of these two industries to the State. The Republicans propose to build them up, to set them fairly on their feet; the Democrats to expose them to the competition with the cheap labor countries with which we are surrounded. Republican legislation restoring silver to its old rank as money gives value to deserted mines, thus gives value to deserted mines, thus giving other thousands steady employment. What does Mr. White offer to give us in exchange of these industries? Simply that if the next Legislature is Democratic the Senatorial vacancy shall be filled by Boss Buckley or one of his lambs.

The Honest Democrat,
[San Francisco Post.]
Says neighbor Brown to neighbor Jones,
As on the street they met.
"I hear you me an to vote for Pond?"
Says neighbor Jones. "You bet:"
"Come, let us have a smite," says Brown.
"A smite—well I should smite," says Jone
like an honest Democrat.

Says neighbor Brown to neighbor Jones,
'When war the land did thrill,
You fought the Rebo at Gettysburg,
And I at Maivera Hill.
Whose money, eloquence and sword
Then helpel us to do that?
I think 'twas Markham's." "So it was,"
Eays the honest Democrat

Says neighbor Brown to neighbor Jones,
Theo all those stormy years,
Where giant men and giant deeds
On history's page appears,
Oh! where—wh re was the placid Pond? I pray you, tell me that.
What did he do?" "Damfino,"
Says the honest Democrat.

Says Brown, "When first our Golden State
Kuccked at the Union's door
Some bade her hearty welcome, while
Some others loydly swore
That slavery must enter, too,
What party, now, did that?"
"My memory is kinder bad."
Says the honest Democrat,

Says Brown. "Woll, that is past and gone; But still I think it tends
To show that he whose only claim
Is paring cand e ends
Is not the one to head the State;
We need a man for that."
"'Null sed! for Markham gets my vote."
Says the honest Democrat.

LETTERS TO THE TIMES.

Anarchy or Nationalism.

Los Angeles, Oct. 6.—[To the Editor of The Times.] A little honest criticism seems to have stirred up the 'Lion of the tribe of Judah;" so much so that he has descended to personali-ties, and accuses me of "utter ignorance" of anarchy and economics. Why should be growl so fierely? The truth is that the "ignorance" he takes exception to touched a tender spot, as will appear when the truth is told about how that plank came to be In-

corporated in the platform.
That it needs some interpretation That it needs some interpretation different from what it plainly reads, is amply proven by the apologies for it by three as honest, fair-minded Nationalists as Mr. Judah—whose article repudiating it in its present form and meaning appeared in answer to my criticism. Just how that plank came to be inserted was fully explained by to be inserted was fully explained by Mr. Owens the first Sunday after the convention, when it was objected to and defended by him. He stated publicly and emphatically

He stated publicly and emphatically that he wrote the Latform; that the plank in question was carefully and exhaustively considered; that it was rightly worded; that no delegate made any objection to it; that the platform had been adopted plank by plank, and was the production of the advance thought and aims of the Nationalists of Southern California.

The next Sunday was set apart for a general discussion of the subject at

Again Mr. Owens made asophistical, rambling speech for his Anarchistic bantling, followed by Schnabel, Wilshire and one or two more; Wilshire going out of his way to denounce the personnel of the United States Army soldier as a stench in the nostrils of all good people. On the same evening Rev. R. M. Webster delivered a lecture at the same hall on the "Naevening Rev. R. M. Second. The proprietors of the four daily papers had had under consideration the question of retrenchment in their several establishments, and agreed unanimously in laying before the Typographical Union, for consideration, the question of a slight reduction in rates of composition—not, however, presenting any ultimatum. The union arbitrarily refused any concession, and on the 4th of August made a stand-and-deliver demand upon the proprietors to sign, within twentyfour hours, a contract maintaining existing rates for the period of one year. The proprietors, believing that to comply would be unmanly and degrading, refused to sign. The strike followed within twenty-four hours, being formally put into force at 5 o'clock before. The proprietors rallied and got out their papers without missing an issue, though much crippled for the

In some sections of the city this pest is very numerous, one lady finding about fifty of them under her carpet the other day, and another, while at church, was informed by a friend that one of the irrepressibles was industriously making a square meal on the shoulder of her dress.

To those who have not yet been awakened to the importance of looking up the invader of our homes we would say that the buffalo bug is no respecter of persons.

A Wandering Empress.

The empress of Austria is not yet cured of her love of wandering far away from her home. As soon as her daughter the Archduchess Marie Valerie is married the Empress Elizabeth intends to start for Amsterdam, whence early in August she will set out for Gibralter on what it is rumored may prove a voy-age around the world. She is as fond of equestrian exercise as ever, but unfortunately the state of, her health has ren dered it necessary for her to finally relinquish her seat in the saddle. How she has walked for some years past is a matter of common talk in Austria-Hungary. To the dismay of her ladies in attendance, the empress has often rambled over the hills of Buda and through the sylvan shades of the Wienerwald till her companions have been literally walked off their legs, and have been obliged to ask their imperial mistress for permission to sit and rest. Even if the empress does not go around the world it is understood that she will certainly pay a visit to America, a country for which she has often expressed great admiration.—Chicago Herald. ter of common talk in Austria-Hungary

An Engineer's Superstition. Elias A. Sullivan, nicknamed by friends "Yank" Sullivan, who bravely met death in the Baltimore and Ohio wreck at Osceola, was one of the best known engineers on the road. "Yank" firmly believed in all the peculiar superstitions to which railroaders as a class pin faith. Two months before his fatal wreck he took his engine, No. 475, the largest on the road, out of the repair shops. On his first trip a wreck occurred on the eastern division. This cemented his half hearted faith in an unlucky Friday. His engine needed repairs shortly

An Electrical Time Stamp.

Wall street is interested in a novel contrivance for registering the exact time of the consummation of bargains. It is always necessary and sometimes vitally important to brokers to know the very minute of the hour when a transaction. tion is legally completed. At times the official quotations of some stock or other change so suddenly and show such a great degree of variance that large losses and big lawsuits have been occasioned by the inability of the contracting pars to determine or agree upon the time of the receipt or cancellation of an order

Because he could not prove the exact minute of the receipt of the counter order from one of his customers a leading broker three weeks ago lost nearly \$10,000 on commissions which he executed on a day when the price of the stock in which he was dealing made several sensational changes. Minutes of time were many dollars of money in that case, and on other occasions a saving or proper use of minutes may be counted in dollars instead of seconds.

A good many inventions to assist the dealers in this matter of recording the exact time of their transactions have been brought to the attention of operators, but none of them has been successful. The last device to simplify business and save time and guard against mistakes is an electrical time stamp. The device is not much larger than an ordinary stamp. It looks like a minia-ture ticker. The mechanism is connected with a standard time clock, and at the beginning of every minute the time indicated by the type on the stamp is changed to agree with the clock by the closing of the electric circuit. An order or paper to be stamped is placed under the figures, a button is pressed, and the exact time is printed on the face of the paper,—New York Sun.

suit the administration. Mr. Conger will not sail for Brazil until after the November elections are decided.

Everything points to a larger vote from the laboring men of California this year than ever before. The industrial people of all channels, from the farm to the mine, the shop and the mill, are more directly interested in the issues of this contest than that of any previous year, and the chances are they will vote their honest convictions regardless of party. The Democratic administration of Mayor Pond in San Francisco, and the wanton extravagance practiced by the Democratic Legislature which has run the tax rate up to a dizzy height, are non calculated to appeal very strongly to the man who supports a family by unceasing toil. The Republican party has always sanctioned and practiced economy in the management of State and national government, and this is the party the workingmen should and will support. The laboring masses have ceased to be mere tools in the hands of politicians. They are thinking for themselves, and will take a prominent part next month in rolling up a handsome majority for Col. Markham and the rest of the ticket, when economy shall succeed extraordinary extravagance in the affairs of the BREVITIES.

What's the matter with buying five cents worth? It would occur to me, if I was entirely out that it was time to buy at least so many. Again, I believe our large dry goods houses as well as some other line of business and I don't believe any storekeeper be he confectioner or grocer, will refuse the poor little tot who is limited to accent for his luxuries, a cake or a stick of candy for a cont. Ladjes who read the remarks by the Eastern Lady will wonder to what use a half yard of ribbon could be put to when the fashions now all call for yards, not inches. Our rule of give and take on the nickle intuities. tracks, for its western terminus was somewhat premature. Mr. Burnett said that such a statement was unauthorized and that there were now being wholly directed towarde building the line to San Pedro. This branch of the road it is proposed to build with all possible dispatch, and until the rails are laid to the sea Pasadena need not expect any startling developments in the way of an unexpected looming up of a trunk line. As things stand now, the railroad people are free to admit that they can build a cheaper trunk line road, with easier grades, through a cafion other than that of the Arroyo Seco. This is a question open to dispute, and what Pasadena wants to do is to convince the railroad magnates otherwise when the proper time comes.

But it can reasonably be predicted that as goon at the San Padro haved.

Pasadena wants to do is to convince the railroad magnates otherwise when the proper time comes.

But it can reasonably be predicted that as soon as the San Pedro branch is completed the company will make use of its franchise which grants it the valuable privilege of running up directly to the center of town. A freight depot and a commodious station will naturally follow, and in due course of time if Pasadena shows herself willing to meet the railroaders half way it would not be surprising if a franchise clear through the town were asked for and portion of a through line.

Several Pasadenians and Mr. Burnett had a taik last Saturday on rail road matters pertaining to this city. While nothing very newsy was developed, we are likely to have no reason to complain. If the trunk line don't come we will still have through connection with San Pedro, which may have a beneficial effect on the price of coal.

to a consideration of the case, and he wrote a short note to Mr. Webb in which he simply said that his sorrow over the death of Mr. Vanderbilt three or four days before had been so poignant that he was unable to consider any business with his son-in-law at present. It is probable that Mr. Gould has not heard from Dr. Seward Webb since.—Philadelphia

Cosmetic manufacturers keep abreast of the times. They send to glovers and designers of fabrics for samples of the "coming colors," which are reproduced not only in perfumes and soaps, but skin lotions and face powders. Early in the year everything ran to lilac tints, of which there were seven different shades. Rumor has it that this is to be a season of silver and magenta, and the pearl powders, the currant, raspberry, garnet and crimson tints are as beautifully re-produced in magnesia, French chalk and pulverized rice as the amber tints of 1885, the violet shades of 1887 and the lilac of a year ago. - Exchange.
